

## Q & A

1. **How will affected resident's vehicles be identified?** No enforcement at first as long as project staff does not notice issues with thru vehicles ignoring the road closure and driving thru the work zone. If excessive vehicles are identified may take have to take action to eliminate to keep the work zone safe. Note access to residences will often be a narrow 1 lane gravel path. Reminder parking on Galena St is not allowed.
2. **What if an affected resident has family visiting during construction?** They will have access just like the resident.
3. **How will mail and package deliveries be handled?** Meeting scheduled Monday, March 7th, with Darlington Post Office. There will likely be 3 locations set up by the Contractor with clusters of temp mailboxes (10-20 per location) on side streets for safe mail delivery and pickup. Mailboxes by curb will need to be removed early on and relocated at end of the project – this is property owner's responsibility. More communication coming from post office/project team before mail delivery will be affected. As far as UPS/FedEx/Etc. package delivery, Contractor is to provide access to front door for foot traffic for delivery.
4. **What if a resident has a local contractor for lawn service during construction?** Will they be allowed access? No problem having these type of services continue during construction. Same goes for service/repairs.
5. **How will the garbage & recycling collection be affected?** Contractor will coordinate with Faherty on access. If any property owners have specific concerns, please reach out. Tuesday morning pickup south of the bridge.
6. **Do you know if there will be any planned power outages?** None planned.
7. **Will the contractor extend the private water service as a discounted cost to the property owner?** Contractor would have to subcontract with a plumber, so likely no discount. Best for property owners to contract with local plumbers themselves and now is the time to do it with yards dug up.
